📝 Mock-Test Mistakes Log

Personal error-review sheet. One card per wrong/tricky question from a mock or PYQ — **question → your answer → correct → the rule you missed**.

The highest-yield revision doc before the exam: revise only what *you* actually get wrong.

How this works: every time a mock shows you a wrong answer, copy the card template (see bottom), fill the 5 fields, and drop it into the right section. Tag it with the **rule** so the weak-area tally at the bottom tells you what to drill.

Q. Choose the correct **active** form of: "*The manuscript will have been translated by the time the review committee submits its final report.*"

OPTIONS	(a) They will have translated the manuscript by the time the review committee submits its final report. (b) They will translate the manuscript before the report… (reorders/meaning change) (c) They will translate the manuscript… (simple future) (d) They have translated the manuscript… (present perfect)
CORRECT	**(a) — "will have translated"**
RULE MISSED	**Future-perfect passive `will have been + V₃` ⇄ active `will have + V₃`. "will have" is the anchor — never drop to "will" (simple future) or "have" (present perfect).**
WHY TRAPS FAIL	(c) **will translate** = wrong tense · (d) **have translated** = wrong tense · (b) reorders the "by the time…" clause and changes the meaning.

Weak-area tally — what to drill

Update the count each time you log a card under that rule. Highest count = your next practice session.

SECTION	RULE / SUB-TOPIC	TIMES WRONG	STATUS
English	Voice — future/modal perfect passive ⇄ active	1	⚠ drill
English	—	0	ok
Quant	—	0	ok
Reasoning	—	0	ok
GA	—	0	ok

How to add an entry (copy this template)

Paste this block inside the right section, fill the 5 fields, then bump the counters in the header & the weak-area tally.

```
<div class="card">
  <div class="meta">
    <span class="tag subj">TOPIC</span>
    <span class="tag hard">SUB-RULE</span>
    <span class="tag">MOCK / SOURCE</span>
    <span class="tag date">logged YYYY-MM-DD</span>
  </div>
  <div class="q"><b>Q.</b> PASTE THE QUESTION</div>
  <div class="row"><span class="lbl">Your answer</span><span class="wrong">(x) …</span>
</div>
  <div class="row"><span class="lbl">Correct</span><span class="correct">(y) …</span></div>
  <div class="row"><span class="lbl">Rule missed</span><span class="rule">THE RULE</span>
</div>
  <div class="row"><span class="lbl">Cross-ref</span><span>link to the reference
sheet</span></div>
</div>
```

Even faster: just send me the mock screenshot and say "add this" — I'll extract the question, correct answer and rule, drop in the card, and update the tally for you.
